

Real-Time Access for Drifting Buoy Data

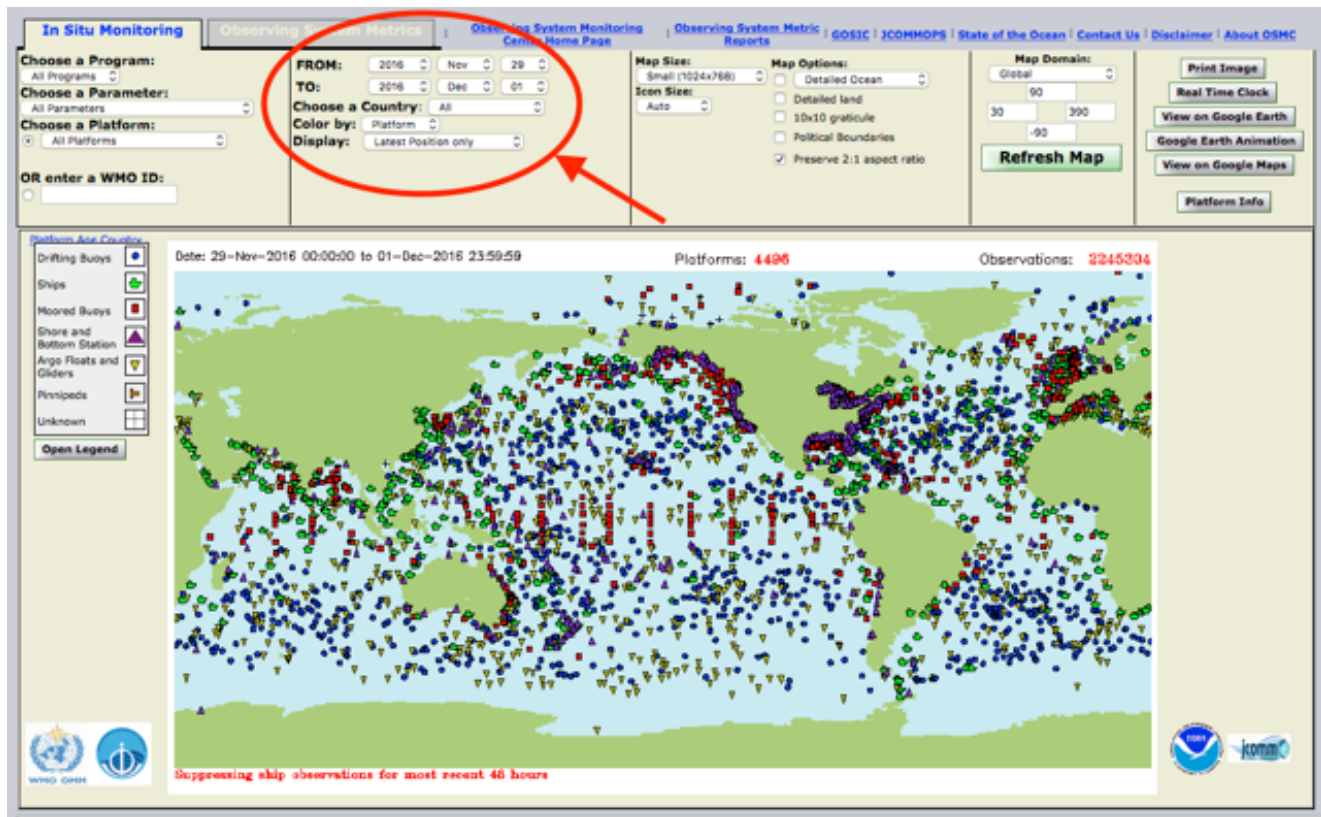

To access real-time data from drifting buoys, please visit the NOAA Observing System Monitoring Center (OSMC) webpage at <http://osmc.noaa.gov/Monitor/OSMC/OSMC.html>.

Here, you'll see the entire in-situ monitoring network, from which you can choose the desired platform(s), date range, specific region, etc.

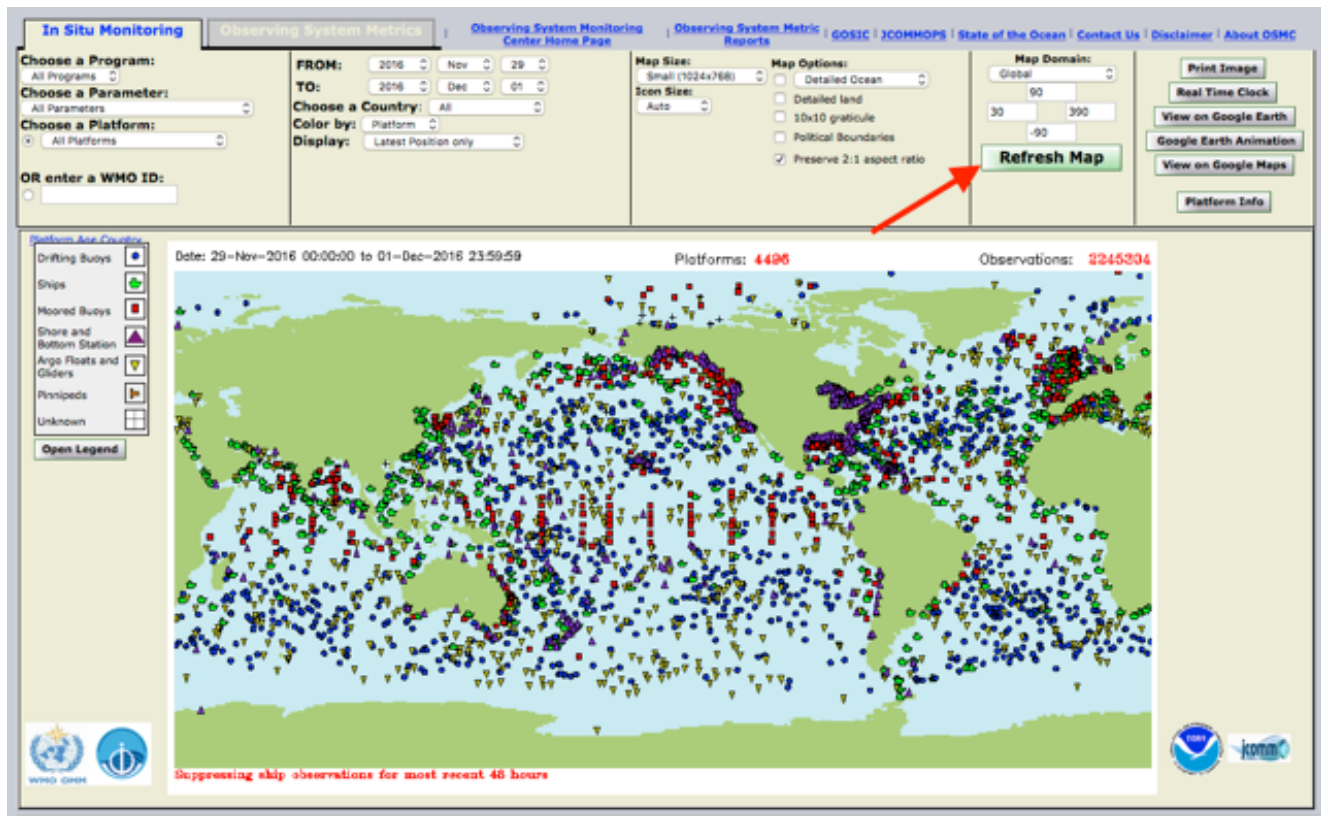

To view an individual buoy, please enter the WMO # into the search field in the top left corner of the screen. If you need WMO #'s, please visit the Global Drifter Program (GDP) Deployment log at <http://www.aoml.noaa.gov/phod/dac/deployed.html>.

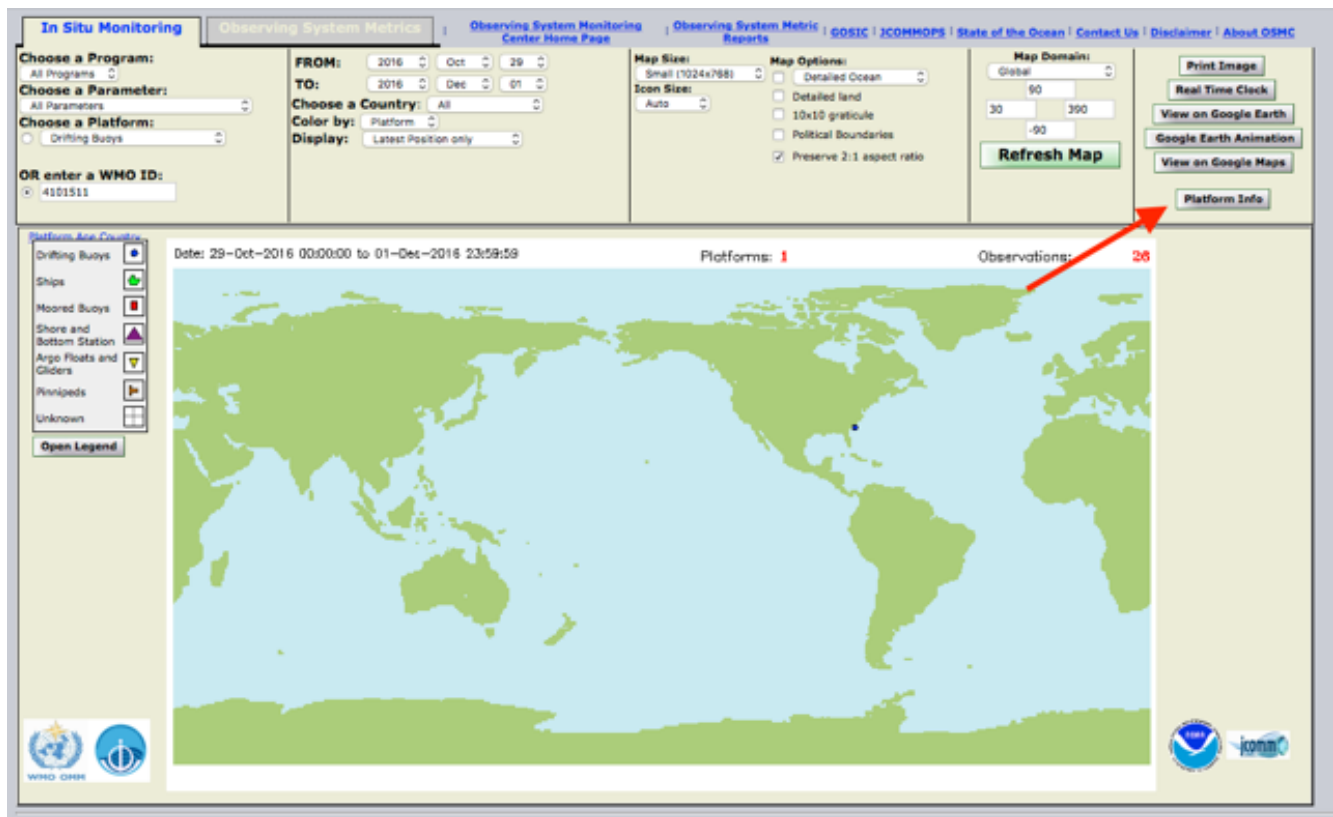

Next, select the desired date range from which you'd like to see data/track line information.

Once you've entered the WMO # and desired dates, please refresh the map.

You should now see only your drifter on the map! From here, select the Platform Info tab on the right side of the screen.

To view the data and/or drifter track line, please select one of these options from the bottom of the screen.
